USE

Please follow steps below:

- 1- Place small pieces of chocolate inside the ceramic bowl and light up the tealight candle. Put only a few pieces first; enough to cover the bottom of the bowl. After approximately 10 minutes, chocolate pieces will start to melt.
- 2- Once pieces start to melt, add a few more pieces of chocolate inside the ceramic bowl and stir with a fondue fork to get an even texture.
- 3- As you eat your fondue, continue adding pieces of chocolate inside the ceramic bowl. Do not wait until there is no more chocolate.
- 4- Tealight candle lasts about 2 hours. Extra tealight candles will be necessary if you plan a longer chocolate fondue meal.

If you are in a rush to eat your fondue, the fastest way to melt chocolate is in a cookware pot on the stovetop. Once chocolate has melted, pour a small amount inside the ceramic bowl and light up the tealight candle. Always be careful when handling hot content.
